

Talentsoft positioned as a “Visionary” in Gartner’s Magic Quadrant for Talent Management Suites

Evaluation Based on Completeness of Vision and Ability to Execute

Paris, June 18th 2014 - [Talentsoft](#), a leading provider in cloud-based Integrated Talent Management, today announced it has been positioned by [Gartner Inc.](#) in the “Visionaries” quadrant of the “Magic Quadrant for Talent Management Suites 2014”¹.

This updated Magic Quadrant assesses the market for talent management suites that includes capabilities for workforce planning, talent acquisition and onboarding, performance appraisal/assessment, goals management, career development, succession management, learning management and compensation management.

“We are very proud to have been positioned as a “Visionary” for the 2nd year in a row in Gartner’s Magic Quadrant for Talent Management Suites. We believe this distinction confirms our ability to innovate and to deliver agile Talent Management best practices for global organizations. We feel this recognition underlines our strong position in the European market as a pure player alternative with a more adaptable and flexible solution.” says **Talentsoft CEO Jean-Stéphane Arcis**.

According to the report, Visionaries are ahead of most potential competitors in delivering innovative products and/or delivery models. They anticipate emerging/changing market needs, and move the market ahead into areas where it hasn't yet been. Visionaries have a strong potential to influence the direction of the talent management suite market, but are limited in execution and/or demonstrated track record.
